

EYE SAFETY: HELPFULL TIPS

Having an uncontrollable impulse to blind yourself? Please reconsider your actions.

NEVER LOOK AT THE SUN

- Do not look at the sun. Doing so risks serious and possibly permant eye injury. Your co-workers will also discover how stupid you are.

REMEMBER TO BLINK

- Never blinking can cause intense pain and discomfort, making it difficult to function normally.

NEVER STAB YOUR OWN EYES

- Stabbing your own eye would cause intense pain and discomfort, and there could be bleeding and swelling. The most severe outcome would be complete blindness in the affected eye or both eyes. We strongly advise to not stab your own eyes with anything.

STAY AWAY FROM FART CLOUDS

- Exposing your bare eye balls to rank fart clouds can lead to pink eye. Symptoms typically include redness, itchiness, a burning sensation, watery discharge, and sometimes crusting of the eyelids.
